CONTENTS OF VOLUME 49

NUMBER 1, 14 APRIL 1970

FITCH, W. M., Further Improvements in the Method of Testing for Evolutionary Homology among Proteins 1

FITCH, W. M., A Method for Estimating the Probability that a Specific Frame-shift Mutation was Selected in the Course of Evolution 15

NEWBOLD, J. E. and SINSHEIMER, R. L., The Process of Infection with Bacteriophage ϕX174. XXXI. Abortive Infection at Low Temperatures . . 23

NEWBOLD, J. E. and SINSHEIMER, R. L., The Process of Infection with Bacteriophage ϕX174. XXXII. Early Steps in the Infection Process: Attachment, Eclipse and DNA Penetration 49

EDELMAN, M., VERMA, I. M. and LITTAUER, U. Z., Mitochondrial Ribosomal RNA from *Aspergillus nidulans:* Characterization of a Novel Molecular Species 67

ROSSI, G. L. and BERNHARD, S. A., Are the Structure and Function of an Enzyme the Same in Aqueous Solution and in the Wet Crystal? . . . 85

INMAN, R. B. and SCHNÖS, M., Partial Denaturation of Thymine- and 5-Bromouracil-containing λDNA in Alkali 93

LAEMMLI, U. K., MÖLBERT, E., SHOWE, M. and KELLENBERGER, E., Form-determining Function of the Genes Required for the Assembly of the Head of Bacteriophage T4 99

SIEGEL, R. B. and SUMMERS, W. C., The Process of Infection with Coliphage T7. III. Control of Phage-specific RNA Synthesis *in vivo* by an Early Phage Gene 115

BUJARD, H., Electron Microscopy of Single-stranded DNA 125

MITRA, S. K., CHAKRABURTTY, K. and MEHLER, A. H., Binding of Transfer RNA and Arginine to the Arginine Transfer RNA Synthetase of *Escherichia coli* 139

HABENER, J. F., BYNUM, B. S. and SHACK, J., Destabilized Secondary Structure of Newly Replicated HeLa DNA 157

WUESTHOFF, G. and BAUERLE, R. H., Mutations Creating Internal Promoter Elements in the Tryptophan Operon of *Salmonella typhimurium* . . 171

YAMANE, T., WÜTHRICH, K., SHULMAN, R. G. and OGAWA, S., Proton Magnetic Resonance Studies of Cyanoferrihemoglobins from Different Species . 197

RADMAN, M., CORDONE, L., KRSMANOVIC-SIMIC, D. and ERRERA, M., Complementary Action of Recombination and Excision in the Repair of Ultraviolet Irradiation Damage to DNA 203

CANTOR, K. P. and HEARST, J. E., The Structure of Metaphase Chromosomes. I. Electrometric Titration, Magnesium Ion Binding and Circular Dichroism 213

CHAN, T.-S. and GAREN, A., Amino Acid Substitutions Resulting from Suppression of Nonsense Mutations. V. Tryptophan Insertion by the *su9*$^+$ Gene, a Suppressor of the UGA Nonsense Triplet 231

LETTERS TO THE EDITOR—

RICHARDSON, J. P., Rates of Bacteriophage T4 RNA Chain Growth *in vitro* 235

HOFFMAN, E. P. and WILHELM, R .C., Effect of *su1*$^+$ Gene Dosage on the Production of Suppressed Alkaline Phosphatase in *Escherichia coli* K12 241

WHITFIELD, H. J., JR., GUTNICK, D. L., MARGOLIES, M. N., MARTIN, R. G., RECHLER, M. M. and VOLL, M. J., Relative Translation Frequencies of the Cistrons of the Histidine Operon 245

ZIPSER, D., ZABELL, S., ROTHMAN, J., GRODZICKER, T. and WENK, M., Fine Structure of the Gradient of Polarity in the *z* Gene of the *lac* Operon of *Escherichia coli* 251

SCHACHTELE, C. F., ANDERSON, D. L. and ROGERS, P., Isolation of a Rapidly-sedimenting Canavanyl-protein–DNA–Membrane Complex from *Escherichia coli* 255

AUSTIN, S. and SCAIFE, J., A New Method for Selecting RNA Polymerase Mutants 263

ANNOUNCEMENT 269

NUMBER 2, 28 APRIL 1970

SALSER, W., BOLLE, A. and EPSTEIN, R., Transcription during Bacteriophage T4 Development: A Demonstration that Distinct Subclasses of the "Early" RNA appear at Different Times and that Some are "Turned Off" at Late Times 271

MARRS, B. and KAPLAN, S., 23 s Precursor Ribosomal RNA of *Rhodopseudomonas spheroides* 297

WELLS, R. D. and LARSON, J. E., Studies on the Binding of Actinomycin D to DNA and DNA Model Polymers 319

BIRD, R. E. and LARK, K. G., Chromosome Replication in *Escherichia coli* 15T$^-$ at Different Growth Rates: Rate of Replication of the Chromosome and the Rate of Formation of Small Pieces 343

Aposhian, H. V., Friedman, N., Nishihara, M., Heimer, E. P. and Nussbaum, A. L., Sequential Cleavage of Dinucleotides from DNA by SP3 DNase. III. Substrate Specificity and Initiation of the Hydrolysis from the 5′-Terminus of Polynucleotides 367

Daneholt, B., Base Ratios in RNA Molecules of Different Sizes from a Balbiani Ring 381

Thomas, R., Control of Development in Temperate Bacteriophages. III. Which Prophage Genes are and which are not *trans*-Activable in the Presence of Immunity? 393

De Coen, J. L., Folding of the Polypeptide Chain during Biosynthesis . . 405

Mindich, L., Membrane Synthesis in *Bacillus subtilis*. I. Isolation and Properties of Strains bearing Mutations in Glycerol Metabolism 415

Mindich, L., Membrane Synthesis in *Bacillus subtilis*. II. Integration of Membrane Proteins in the Absence of Lipid Synthesis 433

Morrison, D. C. and Morowitz, H. J., Studies on Membrane Synthesis in *Bacillus megaterium* KM 441

Brunori, M., Amiconi, G., Antonini, E., Wyman, J. and Winterhalter, K. H., Artificial Intermediates in the Reaction of Haemoglobin. Functional and Conformational Properties of the Cyanmet Intermediates 461

Pulitzer, J. F., Function of T4 Gene *55*. I. Characterization of Temperature-sensitive Mutations in the "Maturation" Gene *55* 473

Pulitzer, J. F. and Geiduschek, E. P., Function of T4 Gene *55*. II. RNA Synthesis by Temperature-sensitive Gene *55* Mutants 489

Letters to the Editor—

Diggelmann, H., Pulitzer, J. F. and Geiduschek, E. P., Relationship between Gene *55* Function, Late Transcription and an Intermediate in the Replication of Bacteriophage T4 DNA 509

Luzzati, D., Regulation of λ Exonuclease Synthesis: Role of the *N* Gene Product and λ Repressor 515

Jeng, Y., Gelfand, D., Hayashi, M., Shleser, R. and Tessman, E. S., The Eight Genes of Bacteriophages φX174 and S13 and Comparison of the Phage-specified Proteins 521

Index to Volume 49

Abortive infection at low temperatures in bacteriophage ϕX174, 23
Actinomycin D, studies on its binding to DNA and DNA model polymers, 319
Alkaline phosphatase, molecular heterogeneity in the amino-terminal region, 577
— —, suppressed, effect of *su1*$^+$ gene dosage on production in *Escherichia coli*, 241
Amiconi, G. (see also Brunori, M.), 461
Amino-terminal region of alkaline phosphatase, molecular heterogeneity, 577
Anderson, D. L. (see also Schachtele, C. F.), 255
Antibiotics, ion transporting, a thermodynamic consideration, 547
Antonini, E. (see also Brunori, M.), 461
Aposhian, H. V., Friedman, N., Nishihara, M., Heimer, E. P. & Nussbaum, A. L., Sequential cleavage of dinucleotides from DNA by bacteriophage SP3 DNase. III. Substrate specificity and initiation of the hydrolysis from the 5′-terminus of polynucleotides, 367
Arginine tRNA synthetase of *Escherichia coli*, binding of tRNA and arginine, 139
Ashton, R. & Steinrauf, L. K., Thermodynamic consideration of the ion-transporting antibiotics, 547
Aspergillus nidulans, characterization of novel molecular species of mitochondrial ribosomal RNA, 67
Asso, J. (see also Jacobson, M. F.), 657
Attachment in the infection process of bacteriophage ϕX174, 49
Austin, S. J. & Scaif, J. G., A new method for selecting RNA polymerase mutants, 263

Bacillus megaterium KM, membrane synthesis studies, 441
Bacillus subtilis, integration of membrane proteins in the absence of lipid synthesis, 433
— —, isolation and properties of strains bearing mutations in glycerol metabolism, 415
Bacteriophage λ DNA containing thymine and 5-bromouracil, partial denaturation in alkali, 93
— —, effect of mutations in the cII and cIII genes on macromolecular synthesis in infected cells, 639
— —, genetic expression, 557
— —, regulation of λ exonuclease synthesis: role of the *N* gene product and λ repressor, 515
— ϕX174, abortive infection at low temperatures, 23
— — and S13, the eight genes, comparison of phage-specified proteins, 521
— —, early steps in the infection process: attachment, eclipse and DNA penetration, 49
— SP3 DNase, substrate specificity and initiation of hydrolysis from the 5′-terminus of polynucleotides, 367
— S13 and ϕX174, the eight genes, and comparison of phage-specified proteins, 521
— T4, characterization of temperature-sensitive mutations in the "maturation" gene *55*, 473
— —, form-determining function of the genes required for the assembly of the head, 99
— —, relationship between gene *55* function, late transcription and intermediate in the replication of DNA, 509
— — RNA, rate of chain growth *in vitro*, 235
— —, — synthesis by temperature-sensitive gene *55* mutants, 489
— —, transcription during development, 271
— T7, control of phage-specific RNA synthesis *in vivo* by an early phage gene, 115
Bacteriophages, temperate, trans-activability of prophage genes in the presence of immunity, 393
Balbiani ring DNA molecules, base ratios in molecules of different sizes, 381
Baltimore, D. (see also Jacobson, M. F.), 657
Bauerle, R. H. (see also Wuesthoff, G.), 171
Bernhard, S. A. (see also Rossi, G. L.), 85
Bird, R. E. & Lark, K. G., Chromosome replication in *Escherichia coli* 15T$^-$. Different growth rates: rate of replication of the chromosome and the rate of formation of small pieces, 343
Bolle, A. (see also Salser, W.), 271
5-Bromouracil- and thymine-containing λ DNA, denaturation in alkali, 93

Brunori, M., Amiconi, G., Antonini, E., Wyman, J. & Winterhalter, K. H., Artificial intermediates in the reaction of hemoglobin with ligands. Functional and conformational properties of the cyanmet intermediates, 461
Bujard, H., Electron microscopy of single-stranded DNA, 125
Butler, B. (see also McMacken, R.), 639
Bynum, B. S. (see also Habener, J. F.), 157

Canavanyl-protein–DNA–membrane complex, rapidly-sedimenting, isolation from *Escherichia coli*, 255
Cantor, K. P. & Hearst, J. E., The structure of metaphase chromosomes. I. Electrometric titration, magnesium ion binding and circular dichroism, 213
Chakraburtty, K. (see also Mitra, S. K.), 139
Chan, T.-S. & Garen, A., Amino-acid substitutions resulting from suppression of nonsense mutations. V. Tryptophan insertion by the *su9*$^+$ gene, a suppressor of the UGA nonsense triplet, 231
Chang, A. C. Y. (see also Cohen, S. N.), 557
Chromosome replication rate in *Escherichia coli* 15T$^-$, 343
Chromosomes, structure of metaphase chromosomes, 213
Circular dichroism used in structure determination on metaphase chromosomes, 213
Cohen, S. N. & Chang, A. C. Y., Genetic expression in bacteriophage λ. III. Inhibition of *Escherichia coli* nucleic acid and protein synthesis during λ development, 557
Cordone, L. (see also Radman, M.), 203
Crystalline enzyme, the question of whether the structure and function of an enzyme is the same in aqueous solution and in the wet crystal, 85
Cyanmet intermediates, functional and conformational properties in the reaction of hemoglobin with ligands, 461
Cyanoferrihemoglobins from different species, proton magnetic resonance studies, 197

Daneholt, B., Base ratios in RNA molecules of different sizes from a Balbiani ring, 381
Davis, F. C. & Sells, B. H., Synthesis and assembly of ribosomal protein into 50 s subunits during recovery from methionine starvation, 527
De Coen, J. L., Folding of the polypeptide chain during biosynthesis, 405
Deoxyribonucleic acid and DNA model polymers, studies on the binding of actinomycin D, 319
— —, complementary action of recombination and excision in the repair of ultraviolet-irradiation damage to DNA, 203
— — cycle of *Myxococcus xanthus*, 609
— —, destabilized secondary structure of newly-replicated HeLa DNA, 157
— — of bacteriophage T4, relationship between gene *55* function, late transcription and intermediate in the replication of DNA, 509
— — — *Escherichia coli*, nucleotide distribution, 603
— —, partial denaturation of thymine- and 5-bromouracil-containing λ DNA in alkali, 93
— — penetration in infection process of bacteriophage φX174, 49
— —, sequential cleavage of dinucleotides by bacteriophage SP3 DNase, 367
— —, single-stranded, electron microscopy, 125
Diggelmann, H., Pulitzer, J. F. & Geiduschek, E. P., Relationship between gene *55* function, late transcription and intermediate in the replication of bacteriophage T4 DNA, 509

Echols, H. (see also McMacken, R.), 639
Eclipse in the infection process of bacteriophage φX174, 49
Edelman, M., Verma, I. M. & Littauer, U. Z., Mitochondrial ribosomal RNA from *Aspergillus nidulans:* characterization of novel molecular species, 67
Electrometric titration used in structure determination on metaphase chromosomes, 213
Electron microscopy of single-stranded DNA, 125
Enzyme structure and function, question of whether these are the same in aqueous solution and in the wet crystal, 85
Epstein, R. (see also Salser, W.), 271
Errera, M. (see also Radman, M.), 203

Escherichia coli, binding of tRNA and arginine to the arginine tRNA synthetase of *Escherichia coli*, 139
— — DNA, nucleotide distribution, 603
— —, fate of ribosomal proteins after degradation of ribosomal RNA's within magnesium-starved cells, 693
— —, fine structure of gradient of polarity in the *z* gene of the *lac* operon, 251
— — 15T⁻, rate of chromosome replication and rate of formation of small pieces, 343
— —, inhibition of nucleic acid and protein synthesis during λ bacteriophage development, 557
— —, isolation of a rapidly-sedimenting canavanyl-protein–DNA–membrane complex, 255
— — K12, production of suppressed alkaline phosphatase, effect of *su1*⁺ gene dosage, 241
Evolutionary homology among proteins, further improvements in the testing method, 1
— selection of a specific frameshift mutation, a method for estimating the probability, 15
Excision and recombination, complementary action in the repair of ultraviolet-irradiation damage to DNA, 203
Exonuclease synthesis regulation in bacteriophage λ, role of the *N* gene product and λ repressor, 515
